

MPhil in Health Systems
Survey Methods
Academic Year 2023

Schedule

Lecturers

Annibale Cois (**AC**)
Rifqah Roomaney (**GL1**)
Jerall Toi (**GL2**)
Alberto Caoci (**GL3**)

Sessions

Session/Time	Topic	Lecturer(s)	Preliminary activities	Additional materials & notes
Session 1: 04/05/2023				
08:30 – 09:30	Lecture 1.0 - Introductions and course overview	AC, SB		
09:30 – 10:30	Lecture 1.1 - The scope of survey research	AC		Online survey
10:30 – 10:45	Break			
10:55 – 11:45	Lecture 1.2 - Surveys in health research	AC		Videos: CHIS Overview video , DHS Overview Video , HUTS Overview video , CRH survey video Readings for exercise
11:45 – 12:30	Lecture 1.3 - Formalising the survey process (I)	AC		
12:30 – 13:30	Lunch			
13:30 – 13:30	Lecture 1.3 - Formalising the survey process (II)	AC		
13:30 – 14:30	Exercise 1 - The SurveyLab environment	AC		In-class exercise
14:30 – 16:00	Exercise 2 - <i>SurveyLab</i> exercise II Describe the environment	AC, SB		AC/SB available online during exercise

Session 2: 11/05/2023				
08:30 – 09:30	Lecture 2.1 - Survey error	AC		
09:30 – 10:00	Lecture 2.2 - Target population, study population and sampling	AC	Reading: Leibbrand2009	
10:00 – 11:00	Lecture 2.3 - Sampling strategies (I)	AC	Reading: Sholtz2021	
11:00 – 11:30	Break			
11:30 – 12:30	Lecture 2.3 - Sampling strategies (II)	AC		
12:30 – 12:45	Presentation of Assignment 1	AC		Assignment 1
12:45 – 13:45	Lunch			
13:45 – 14:15	Presentation of results of exercise 2 and discussion	AC, SB	Complete exercise 2	
14:15 – 16:00	Exercise 3 - <i>SurveyLab</i> exercise III Sampling, bias and precision	AC, SB		AC/SB available online during exercise
Session 3: 18/05/2023				
08:30 – 9:30	Presentation of results of exercise 3 and discussion	AC	Complete exercise 3	
09:30 – 10:00	Exercise 4 - <i>SurveyLab</i> exercise IV Sampling, bias and precision	AC		In-class exercise
10:00 – 11:00	Lecture 3.1 - Power, precision and sample size	AC		
11:00 – 11:30	Break			
11:30 – 13:00	Lecture 3.2 - Measurement	AC		
13:00 – 14:00	Lunch			
14:00 – 16:00	Exercise 5 - <i>SurveyLab</i> exercise V Response rates	AC, SB		AC/SB available online during exercise
Session 4: 25/05/2023				
08:30 – 09:00	Presentation of results of exercise 5 and discussion	AC	Complete exercise	
09:00 – 10:00	Lecture 4.1 - Non-response bias	AC		
10:00 – 11:00	Lecture 4.2 – Questionnaire & modes of administration	AC		
11:00 – 11:30	Break			

11:30 – 12:00	Lecture 4.3 - Beyond questionnaires	AC		
12:00 – 13:00	Lecture 4.4 - Fieldwork	GL1		
13:00 – 14:00	Lunch			
14:00 – 15:00	Lecture 4.5 - Data management	AC		
15:00 – 15:15	Presentation of Assignment 2	AC		
Session 5: 01/06/2023				
08:30 – 09:30	Lecture 5.1 - Data analysis & reporting	AC		
09:30 – 10:00	Lecture 5.2 - Ethical Aspects	AC		
10:00 – 11:00	Lecture 5.3 - Privacy and the POPI act	GL2		
11:00 – 11:30	Break			
11:30 – 12:30	Lecture 5.4 - Qualitative methods in survey research	GL3	Video-lecture: Qualitative methods in survey research	Prepare questions and comments based on video-lecture
12:30 – 13:30	Lunch			
13:30 – 14:00	Lecture 5.5 - Course recap, Presentation of exam	AC, SB		
14:00 – 15:00	Course evaluation, final remarks	AC, SB		Course evaluation form online

SurveyLab activities

Topic	Content	Details
SurveyLab exercise I	Familiarize with the <i>SurveyLab</i>: access, structure, functioning	Description and invitation to test and share screens
SurveyLab exercise II Describe the environment	Explore and describe the virtual environment (geography, population, environment, health hazards, health systems resources and access)	- Distribute participant in 5 groups. Each group analyses a region and reports on its characteristics. - During the review each group describes a region. Everybody speaks in the group (split subjects). - Ask regarding difficulties in using the system.
SurveyLab exercise III Sampling, bias and precision	- Explore consequences (in terms of bias, precision and cost) of different sampling strategies:	- Estimate prevalence of COPD in the national population - Fixed sample size: 1000 - Three sampling strategies: (1) simple random sampling; (2) stratified by region; (3) Convenience (only capital cities); - Take note of: (1) sampling realization; (2) cost; (3) results - Repeat 10 times - Send to me by 15/05
SurveyLab exercise IV Sampling, bias and precision	Explore consequences (in terms of bias, precision and cost) of different sample sizes	Repeat same exercise but with sample = 3000
SurveyLab exercise V Response rates	Explore consequences (in terms of response rates and total survey cost) of different types of questionnaires	- Estimate prevalence of COPD in the town of Maunatau (same for all participants) - Fixed sample size: 300 - Simple random sampling - Two different questionnaires (10 items; 20 items) - Take note of: (1) sampling realization; (2) cost; (3) results - Repeat 10 times
